[www.passetonbillet.fr](http://www.passetonbillet.fr) (Drupal 8, Finished: <http://live-passetonbillet.pantheonsite.io/> )

Online ticket selling website, integrating third party APIs to fetch & list the tickets from  
different sources.

**Profile** I am a Drupal Developer & have been working with Drupal for more than 9 years. I  
write code that strictly comply with Drupal coding & security standards.

I build Drupal websites/apps using Drupal8 & Drupal7. I build web Apps of sizes &  
complexities. That includes building custom modules and themes for all versions of  
Drupal using Drupal API. I create new entities using custom modules, can work with  
views, tools, panels, features and other important & basic modules. I also build  
custom modules based on Drupal commerce & ubercart API.

I maintain & manage Drupal websites, migrate sites built with different  
CMS/framework to Drupal, manage your servers and use GIT in a collaborative  
environment.

I contribute back to community. My D.O profile can be viewed here:  
<http://bit.ly/beautifulmind19>

- Skills**
- Drupal6, Drupal7, Drupal8
  - Apache, Nginx
  - MySQL, PHP, Ajax, jQuery, CSS3, HTML5
