Work

- <http://live-toursiting8.pantheonsite.io> Tour booking website underdevelopment using Drupal8.
- <http://live-encyclopediarts.pantheonsite.io/> (Drupal 8) An Encyclopedia in French, allows user to upload & mange images, videos, maps, etc. This is complete build from scratch project with very complex core features, with lots of custom module & templates.
- www.cve.edu.au Migration to Drupal7 from Drupal6.
- www.keylet.co.uk Real estate website, built using Drupal7, integrating Vebra API.
- <http://www.summersfloral.com.au> Online floral selling website, integrating instagram.
- www.flymates.fr Online flight booking website, with pilot location & availability.
- www.passetonbillet.fr Online ticket selling website, integrating third party APIs to fetch & list the tickets from different sources.
- <http://www.collemory.com> Collemory allows a group of people to come together and create a meaningful gift for someone special.
- www.fei.org A simple, yet intuitive website built for FEI using Drupal6 initially. I was part of the team and later in charge of the project.
- www.eslready.com (Drupal7) A social network for Teachers, Students & Schools. They write review about each other & get hired.

Profile I am a Drupal Developer & have been working with Drupal for 10 years. I write code that strictly comply with Drupal coding & security standards.

I build Drupal websites/apps using Drupal8 & Drupal7. I build web Apps of sizes & complexities. That includes building custom modules and themes for all versions of Drupal using Drupal API. I create new entities using custom modules, can work with views, ctools, panels, features and other important & basic modules. I also build custom modules based on Drupal commerce & uberchat API.

I maintain & manage Drupal websites, migrate sites built with different CMS/framework to Drupal, manage your servers and use GIT in a collaborative environment.

I contribute back to community. My D.O profile can be viewed here:
